

# Adaptable Precision Airdrop System

HALO parachute sensitive supply in  
challenging Terrains with minimal drift

**Enables autonomous and  
remote-controlled flight**

**Rapid release mechanism to enable quick drop, day or night, without the need to land the drone**

**Parachute system based on a small pilot  
parachute that is configured according to  
flight characteristics to enable minimum  
drift even in extreme weather conditions**

**Highly customizable for both  
military grade and commercial  
drones**

**Proven capability for parachuting  
sensitive equipment like medical  
supplies, sensors and etc.**

**PARAZERO**  
A World of Drone Innovation
